Learn the Verse

multiplication
(mŭl'tə-plē-kā'shən)

Multiplication is a short way of adding numbers that are alike.

3 (3 times 5)
× 5 means to add 5 three times.

$$\begin{array}{r} 3 \\ \times 5 \\ \hline 15 \end{array}$$

Column
(kŏl'əm)

means "something in the form of a pole."

Multiply
(mŭl'tə-plī')

× means "times."

Divide (dī-vīd') means "to put into equal groups."

There are 5 circles in each group.

Multiplication is a short way of adding numbers that are alike.

Multiplying 5s is easy! We know how to count by 5s.

$$\begin{array}{r} 3 \\ \times 5 \\ \hline \end{array}$$
 (3 times 5) means to add 5 three times.

$$\begin{array}{r} 5 \\ 5 \\ + 5 \\ \hline \end{array}$$

Write by 5s to 45.

Do you know what answer has to end in a zero?

Yes! When five is multiplied by an even number, the answer always ends in zero.

If that is so, what happens when 5 is multiplied by an odd number?

That's easy! The answer always ends in a 5.
